Change in Parts Codes for PTFE Diaphragms

Thank you for your continuous support to YAMADA.

Regarding the PTFE diaphragms for 1/4", 3/8" and 1" for NDP series (i.e. NDP-5, DP-10 and NDP-25) and DP-F series (i.e. DP-5F, DP-10F and DP-25F), the same parts codes were used for the same sizes of diaphragms (e.g. 771093 for the PTFE diaphragm for both NDP-5 and DP-5F).

From Aug 1st 2024, however, the suffix 'F' will be added to the end of the codes only for the diaphragms for the three kinds of DP-F models noted above.

Pump Model	Old Code	New Code
DP-5F	771093	771093F
DP-10F	770933	770933F
DP-20F	770805	Unchanged
DP-25F	771110	771110F
DP-38F	771814	Unchanged

The reason for the above change is to differentiate the ones for High Purity Series (Semiconductor grade) and the standard NDP models.

Please use the new codes stipulated in the table above when placing an order for the diaphragms for the DP-F series pumps.

Best Regards,

Yamada International department
